Planning Experience

NCHSE Bhopal Summer Training June 13th 2011 to July 28th 2011

Study of Urban Perspective Plan 2021 for Madhya Pradesh

Health Services management system in Ujjain

Watershed management works

Academic Studio's

- Studio I A: Area planning exercise. Three groups of five people each were assigned areas of ten hectares each at Kolar Road, Hoshangabad Road and Bawariakalan Road. Areas chosen were identified on the basis of their location and potential they hold for future development. The exercise involved doing socio economic survey of the area, studying land prices, current development trends and providing solutions on the basis of results. The thrust was on to develop suitable and affordable housing solutions as per need and budget of people.
- Sem II: Preparing a City Development Plan for Ujjain city. Different planning approaches and their pros and cons were ascertained before embarking on the exercise. Methodology involved doing various types of surveys, collecting data, analyzing and interpreting data and providing solutions on various aspects of development plan. Industries, Economics and trade aspects of the city were dealt by me.
- SEM III: National Capital Region Thimphu Bhutan. Visited Bhutan and collected secondary data from various government organizations and local authorities. Four Districts of Paro, Punakha, Wangdue and Thimphu were delineated for the exercise. Visited all four districts and noted salient features of them. Study of existing transport and road network and proposals for development, management and finance of the projects were undertaken by me. Report of the work carried out was presented to Bhutan government for considering the proposals suggested.
- SEM IV: Industrial Regionalization in Madhya Pradesh. Thesis work carried out with objective of finding possibilities of generating employments in manufacturing sector on the basis of merits and strengths of regional areas. The relevance of study is also important to check concentration of capital and resources in few areas and into few hands. The study is empirical in nature and tries to identify new suitable industrial areas in State of Madhya Pradesh.
